

[Actividad extracurricular 2b] Ajuste de curvas [doble descenso]

Nombre: Erick Cuichan

Curso: GR1CC

What the Books Get Wrong about AI [Double Descent]

The screenshot shows a YouTube video player with a dark theme. The main video area displays a graph with the x-axis ranging from -1 to 2 and the y-axis from 0 to 2. The graph features three data series: 'Training Data' (yellow dots), 'Testing Data' (blue dots), and a 'Target Function' (a smooth grey curve). The Training Data points follow the Target Function closely, while the Testing Data points show a U-shaped trend, illustrating the 'Double Descent' phenomenon where model performance on new data improves as model complexity increases beyond a certain point. The video player interface includes a search bar at the top, a video title 'What the Books Get Wrong about AI [Double Descent]' by 'Welch Labs' (888 k subscribers), and a progress bar at 10:39 / 34:05. The video has 13 k likes and various interaction buttons like 'Compartir', 'Preguntar', and 'Guardar'. A sidebar on the right shows recommended videos, including 'The most complex model we actually understand' and 'Pero ¿qué es una red neuronal? | Capítulo 1, ...'.

Fotografía de seguimiento del video.
